

# AutoSpec 700 Inspection Table

## Softgels, Capsules & Tablets

SETPOINT™

Setpoint understands that inspection of your product is a critical step in the production process. The AutoSpec 700 Inspection Table is designed for the inspection of various softgels, capsules, and tablets.

Setpoint's AutoSpec 700 offers a low cost solution for inspection of multiple pills.

### Benefits

- Typical speed of 100,000 capsules / hour
- Simple removal of rollers for easy cleaning
- Inspect all pill types without changeovers

### Features

- Variable speed conveyor
- Variable roller "pill flipping" speed
- Mirror for backside pill inspection
- Ribbed Lexan rollers for pill rotation
- Perforated hopper vibratory feed plate that allows for chip and dust removal
- Adjustable light placement

### Additional Options

- Vacuum separation of non-conforming capsules
- In-feed conveyor
- Underside conveyor lighting
- Metal detector
